ATTACHMENT TO ADVISORY ACTION.

1. Applicant's amendment filed December 9, 2002 in Paper No. 13 has been reviewed but will

not be entered because the new claim limitations wherein the probe is "at least 15 nucleotides" and

hybridizes under stringent conditions to a variant human cytochrome P-450 gene having a T to C

variance at nucleotide 732 and does not hybridize under stringent conditions to a human cytochrome

P-450 gene not having a T to C variance at 732" requires further search and consideration.

Specifically, the new claim limitation changes the scope of the claims which was not considered in

the prior Office actions. Likewise, the claims are confusing at "stringent conditions" because the

hybridization conditions have not been defined in the specification or claims and it cannot be

determined what is considered "stringent conditions". Accordingly, a new search and consideration

is required to determine patentability.
